

Bethesda Clinic in Tschugg Switzerland

Bethesda Clinic in Tschugg also belongs to HEPRO customers' portfolio and, therefore, to Girbau's as well. Surrounded by vineyards, the clinic is located in mid of the Bernese Seeland, between the lakes of Biel, Murten and Neuchâtel at the foot of Jolimont. When the weather is good, the idyllic landscape of villages and vineyards and a breathtaking view of the Alps can be enjoyed. Bethesda Clinic is both the first Parkinson's disease centre of Switzerland, as well as the first of neurorehabilitation and epileptology location.

Ten years ago, the gradual optimization of the treatment of laundry began. At that time they had decide the type of laundry supplies they wanted and needed, as Esther Bachmann, head of administration of the clinic Bethesda, remembers. Their decision was to create their own laundry and waive any external solution. In the last few years the type of patients changed considerably and, today, Bethesda Clinic exclusively serves rehabilitation; so, there has also been a change in the type of the linen supply. "We have an impressive amount of private laundry," says Esther Bachmann. "That's why it's important that smaller machines for washing smaller batches are available." Accordingly, the laundry was reorganized.

Today, the following Girbau washer extractors are working at Bethesda Clinic:
